Pionex Dual Investment Scripts (Whop + YouTube)

Read at a natural pace. Words in [brackets] are stage directions or on-screen cues, do not read them out.

Script 1: Whop Community Version (about 3.5 min)

[DO NOT READ. Script 1 is for the Whop community only. Keep it out of any product or sales page and never link it to a checkout. If the video sits next to a price, the refund line is only "Backed by our 14-day change-of-mind refund. Your Australian Consumer Law rights also apply."]

[0:00 HOOK, say to camera, fast and confident]

"Nobody knows what price will do next. Here's how Pionex Dual Investment actually works, including how you can lose."

[0:08 INTRO]

"Hey team, [Name] here. Quick one on a product a lot of people ask about.

Let's be real. Nobody knows if the pump comes. Chatter is not a chart."

[0:21 WHAT IS A CALL OPTION]

"First, what's a call option? It's the right to buy something at a set price, by a set date.

Think eggs. A restaurant pays a farmer a fee to lock in the price of eggs for six months. If prices spike, the restaurant wins. If prices drop, the farmer keeps the fee. That fee is called a premium.

Someone always sells that right. And the seller gets paid upfront."

[0:50 HOW RWA PLAYERS USE IT]

"Some investors in property, gold and shares use a similar idea, often called a covered call. They agree to sell above a set price and are paid a fee for that promise. It caps their upside, and they still carry the full downside if prices fall. Crypto has products built on the same idea."

[1:13 PIONEX DUAL INVESTMENT]

"On Pionex, Dual Investment lets you do a version of this.

Price at or above your target on settlement day? Your coin is sold at the target and you receive USDT, plus a fixed yield, which is really the option premium. Price below your target? You keep your coin, plus the yield, but that coin may now be worth much less than when you started. The yield doesn't protect you from a falling price, and your funds are locked until settlement."

[ON SCREEN: "Returns not guaranteed. Your capital is not protected. Funds are locked until settlement. Rates change."]

[1:48 FOUR THINGS TO UNDERSTAND]

"Four things to understand before using any product like this.

Only consider it with a coin you'd genuinely accept selling at the target price.

Know that the target is the most you can get for that coin during the term.

Your money is locked until settlement, so never commit money you might need before then.

No leverage. Leverage can wipe out a position."

[2:15 TIME AND CHARTS]

"Settlement is automatic, so you don't need to watch charts all day. A price alert is enough if you want to know where price is."

[2:26 THE HONEST TRADE-OFF]

"One honest note. If price rockets way past your target, you won't catch the extra. That's the price of the fee. And if price falls, you still hold the coin at the lower value. That's the other half of the trade."

[2:43 CLOSE]

"Questions about how dual investment works? Ask in the chat. We explain concepts only and can't comment on your own coins, targets or trades."

[ON SCREEN for at least 5 seconds, same words as spoken below]

"Education only, not financial advice. Crypto and DeFi carry significant risk, including total loss of capital. This is general information only. Market Pros does not hold an Australian financial services licence and does not give personal advice. It does not consider your objectives, financial situation or needs. Past or example results don't indicate future results. Consider independent advice. Dual Investment is an option-based product. Returns aren't guaranteed and your capital isn't protected."

"See you inside."

[END CARD, on screen]

[STEWART TO PICK ONE: "Market Pros isn't affiliated with Pionex and receives no payment from it." OR "We may receive a referral fee if you sign up through our link."]

Script 2: YouTube Channel Version (about 4.5 min)

Title: "Pionex Dual Investment Explained (and How You Can Lose)" or "Dual Investment in Plain English: The Trade-offs".

[0:00 HOOK, say to camera, fast and confident]

"Nobody knows what price will do next. Here's how Pionex Dual Investment actually works, including how you can lose."

[0:08 INTRO AND PROMISE]

"Hey, I'm [Name]. If you're new here, I explain crypto in plain English.

I'll explain what a call option is, and how Pionex's Dual Investment product works, including the trade-offs. Stay to the end for the one most people miss."

[0:25 REALITY CHECK]

"First, a reality check. Nobody can promise a pump, so this isn't a bet on one."

[0:32 CALL OPTIONS EXPLAINED]

"What's a call option? It's the right to buy something at a set price, by a set date.

Picture a restaurant worried about egg prices. They pay a farmer a fee to lock in a price for six months. If eggs spike, the restaurant wins big. If eggs drop, the farmer keeps the fee and the restaurant walks away.

That fee is the premium. The buyer gets the right. The seller gets paid upfront.

Now, who do you want to be? The buyer has limited loss and big upside, but the buyer pays for it. The seller collects the fee, but gives up some upside. Both sides exist in every market."

[1:20 HOW RWA PLAYERS MOVE]

"Some investors in property, gold and shares use a similar idea, often called a covered call. They agree to sell above a set price and are paid a fee for that promise. It caps their upside, and they still carry the full downside if prices fall. Crypto has products built on the same idea."

[ON SCREEN: simple graphic, "Fee now. Upside capped. Downside still yours."]

[1:43 PIONEX DUAL INVESTMENT]

"Pionex's Dual Investment is a packaged version of this idea. The screen looks simple, but it's still an option-based product.

Price at or above your target on settlement day? Your coin is sold at the target and you receive USDT, plus a fixed yield, which is really the option premium. Price below your target? You keep your coin, plus the yield, but that coin may now be worth much less than when you started. The yield doesn't protect you from a falling price, and your funds are locked until settlement.

It is not guaranteed. Rates change daily, so always check the live numbers on screen before you commit."

[SCREEN RECORD: open Dual Investment, show the target price, date and rate fields. Do not show a live rate as a headline. Hold this caption on every frame, together with the picked line below: "Shown for education only. Not a recommendation to use this product, coin, target or date."]

[STEWART TO PICK ONE: "Market Pros isn't affiliated with Pionex and receives no payment from it." OR "We may receive a referral fee if you sign up through our link."]

[2:29 FOUR THINGS TO UNDERSTAND]

"Four things to understand before using any product like this.

Only consider it with a coin you'd genuinely accept selling at the target price.

Know that the target is the most you can get for that coin during the term.

Your money is locked until settlement, so never commit money you might need before then.

No leverage. Leverage can wipe out a position."

[2:56 TIME AND CHARTS]

"Settlement is automatic, so you don't need to watch charts all day. A price alert is enough if you want to know where price is."

[3:07 THE LAST RULE]

"The last rule. If price flies way past your target, you won't catch the extra. That's the trade. You swapped some upside for a fee and a plan. Don't spend the next week being annoyed at what you missed. And if price falls, you still hold the coin at the lower value. That's the other half of the trade."

[3:32 CTA AND CLOSE]

"If this helped, subscribe. Questions about how it works are welcome in the comments. I can't comment on your own coins, targets or trades."

[ON SCREEN for at least 5 seconds, same words as spoken below]

"Education only, not financial advice. Crypto and DeFi carry significant risk, including total loss of capital. This is general information only. Market Pros does not hold an Australian financial services licence and does not give personal advice. It does not consider your objectives, financial situation or needs. Past or example results don't indicate future results. Consider independent advice. Dual Investment is an option-based product. Returns aren't guaranteed and your capital isn't protected."

"See you in the next one."

[END CARD, on screen]

[STEWART TO PICK ONE: "Market Pros isn't affiliated with Pionex and receives no payment from it." OR "We may receive a referral fee if you sign up through our link."]
